

Inside Screw Gate Valves

Inside screw gate valves are used underground with indicator posts attached or as roadway box valves (curb box installation). FM Approved valves are available with a variety of end connections as indicated in the listings.

Valves having Ring-Tite, Fluid-Tite or Tyton-Joint connections should be anchored in place during installation. Unless otherwise noted in the listing, these valves have 175 psi (1205 kPa) rated working pressure.

FIG 114.1FF/114.2FF

Resilient Seated Gate Valves with Indicator Post flanges. 4 through 12 in. NPS. Valves have a rated working pressure of 232 psi (1600 kPa). Available with the following end connections.

Model	Size, in. (mm)	End Connection
